

Love and Logic is a common-sense approach that provides educators and parents easy-to-learn skills that create respect, responsibility and good decision-making in youth.

Love and Logic rests on 4 scientifically-based principles:

1. Logical consequences delivered with empathy
2. Collective thinking and problem-solving
3. Shared control
4. Adult-child relationships that build mutual respect and self-esteem

*Please join us for a free parenting class based on the principles of Love and Logic.*
